Easy-to-Use and Operate!

Stay on-ratio with the ProMix Easy electronic proportioning system and benefit from substantial cost and material savings. Perfect for mixing most two-component solventborne and waterborne epoxies, polyurethanes and acid-catalyzed varnishes, this meter- or pump-based system is simply an easier way to mix!

User-friendly controls make this the easiest unit to operate in the market

Intrinsically-safe design means pumps and controls only require air to operate

Offered in four pump versions for use in all spray technologies

Patented mixing technology provides superior quality

Shutdown and alarm features prevent spraying off-ratio

CONTROL

FIVE SIMPLE STEPS TO SET UP AND SPRAY!

- 1** Turn on air supply
- 2** PRIME system
- 3** Turn selector to SPRAY
- 4** Set desired ratio
- 5** Press the green start button

YOU'RE READY TO SPRAY!

Simple and Accurate Ratio Assurance

On-Ratio Performance

Automatically maintain the mixing ratio within predefined tolerance limits, down to $\pm 1\%$ with the meter version and $\pm 5\%$ with the pump version. If exceeded, the system will stop production, preventing any off-ratio material from reaching your product, virtually eliminating expensive re-work.

The ProMix Easy allows you to spray with confidence by staying on-ratio when competitors cannot.

FLUID MANIFOLD

Benefit from the new ProMix Easy fluid manifold design! It offers a 20% reduction in solvent flushing vs. standard integrator mixing systems. Valves have been redesigned for quicker response and improved efficiency. The flexible manifold design allows you to run single or multiple pumps and meters.
